

'Volvo Controller Area Network (CAN) Diagnostics'

The Volvo Controller Area Network (CAN) diagnostics course begins by looking into the reasons why manufacturers are now using this method for vehicle communication. The next part of the course explores the construction and modules on the CAN network before looking at how to best interpret and understand fault codes read out via the *Autologic* tool. The course concludes with how to diagnose and repair CAN faults with everyday tools.

Key topics covered:

- Understanding CAN messaging and communication
- Cables and speeds used on the network and how to identify them
- Termination resistors - where and how to diagnose
- CAN BUS measurements
- Pico signals
- Checking module communication with the *Autologic*
- Live practical testing

Date: 28th March 2012

Time: 09.30 - 17.00

Location: Autologic House, London Road
Wheatley, Oxon, OX33 1JH, UK
